Increase Your Brand Visibility among Your Target Audience in this *Hydrocarbon Processing* Bonus Report

Hydrocarbon Processing's Construction Boxscore Database is tracking over \$1.8 T in active downstream projects across the globe. Approximately 60% of active projects are in the preconstruction stage, with nearly 40% of those yet to award an engineering, procurement and construction contractor. These new capacity additions are imperative for countries to supply the increasing demand for energy. The need to invest in more efficient capacity continues to drive capital spending.

Hydrocarbon Processing's Engineering & Construction Solutions Bonus Report will address important HPI and E&C issues of the day, including such questions as: How can operators and EPC firms increase efficiency? What are the keys to a successful project? What are the improvements to supply-chain management? What are the new developments in site construction? How can skilled designers and laborers be located to build world-scale manufacturing capacity in developing regions? How can engineering and procurement be efficiently managed from offices in various time zones?

Sponsorship of the Bonus Report aligns your company's message alongside *Hydrocarbon Processing's* trusted editorial content for maximum effectiveness. Targeted advertising reaches a more engaged audience interested in the products/services you provide, plus the ability to provide educational content, helps build your own brand authority and trust.

Sponsorship Includes:

- Full-page display advertisement
- Full-page of editorial content (subject to Publisher's approval)
- 25 complementary copies of the Engineering & Construction Solutions Bonus Report. Additional copies may be purchased at cost.

Cost:

2018 Rates Apply. Rates are commissionable at 15% of gross billing.
