HYDROCARBON PROCESSING

HydrocarbonProcessing.com

Increase Your Brand Visibility among Your Target Audience in this *Hydrocarbon Processing* Bonus Report

Sulfur is an important element in the downstream industry with regard to opportunity (high-sulfur) feedstocks, specialty end-products and new legislation calling for cleaner, lower-sulfur fuels. Climate change and carbon-management policies will affect the processing of transportation fuels and the way refineries and gas processing plants operate. Hydrocarbon Processing's Sulfur Management Bonus Report, will answer some important questions about sulfur and sulfur-containing compounds commonly found in HPI facilities and product streams and feeds.

Sponsorship of the bonus report aligns your company's message alongside *Hydrocarbon Processing's* trusted editorial content for maximum effectiveness. Targeted advertising reaches a more engaged audience interested in the products/services you provide, plus the ability to provide educational content, helps build your own brand authority and trust.

Sponsorship Includes:

- Full-page (or half page) display advertisement
- Full-page (or half page) of editorial content (subject to Publisher's approval)
- 25 complementary copies of the Sulfur Management 2018 Bonus Report. Additional copies may be purchased at cost.

Cost:

\$10,770 gross for full page display advertisement (\$6,990 for a half page). Sponsors benefit from the full page (or half page) profile at no charge! Commissionable at 15% of gross billing.
