Increase Your Brand Visibility among Your Target Audience in this Special Hydrocarbon Processing Supplement

Sulfur is an important element in the downstream industry with regard to opportunity (high-sulfur) feedstocks, specialty end-products and new legislation calling for cleaner, lower-sulfur fuels. Climate change and carbon-management policies will affect the processing of transportation fuels and the way refineries and gas processing plants operate. Hydrocarbon Processing’s Advances in Sulfur Management 2017 Supplement, will answer some important questions about sulfur and sulfur-containing compounds commonly found in HPI facilities and product streams and feeds.

Sponsorship of the supplement aligns your company’s message alongside Hydrocarbon Processing’s trusted editorial content for maximum effectiveness. Targeted advertising reaches a more engaged audience interested in the products/services you provide, plus the ability to provide educational content, helps build your own brand authority and trust.

Sponsorship Includes:
- Full-page display advertisement
- Full-page of editorial content (subject to Publisher’s approval)
- 25 complementary copies of the Advances in Sulfur Management 2017 Supplement. Additional copies may be purchased at cost.

Cost:
2017 Rates Apply. Rates are commissionable at 15% of gross billing.

For additional information, please contact your Hydrocarbon Processing representative.
